

OUR VISION

Accelerate our ability to develop the crops that benefit humanity now and in the future by increasing our understanding of the relationship between traits, genes, and the environment.

Cross of the Future

A  FFAR COLLABORATIVE

Founding Partners

Initial Focus

Wheat

Maize

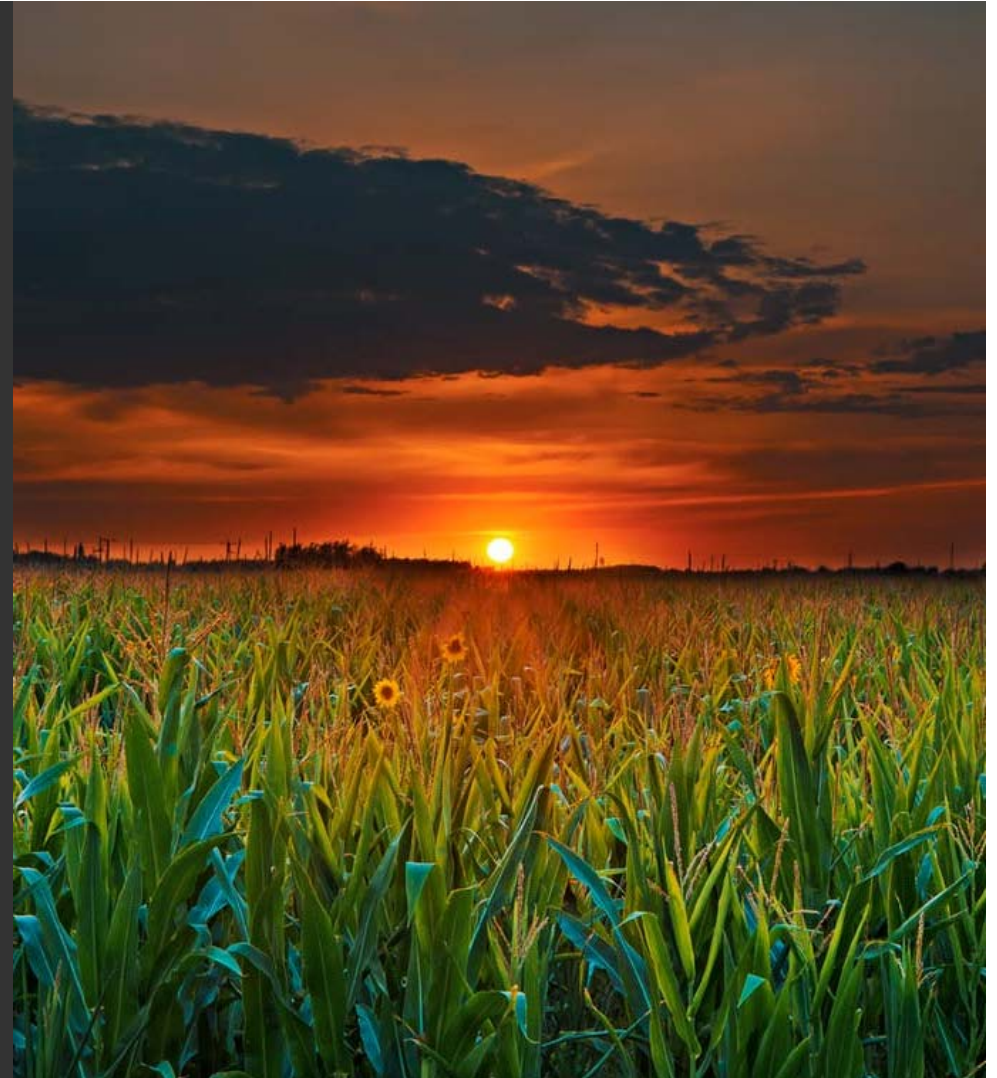

**Leafy
greens**

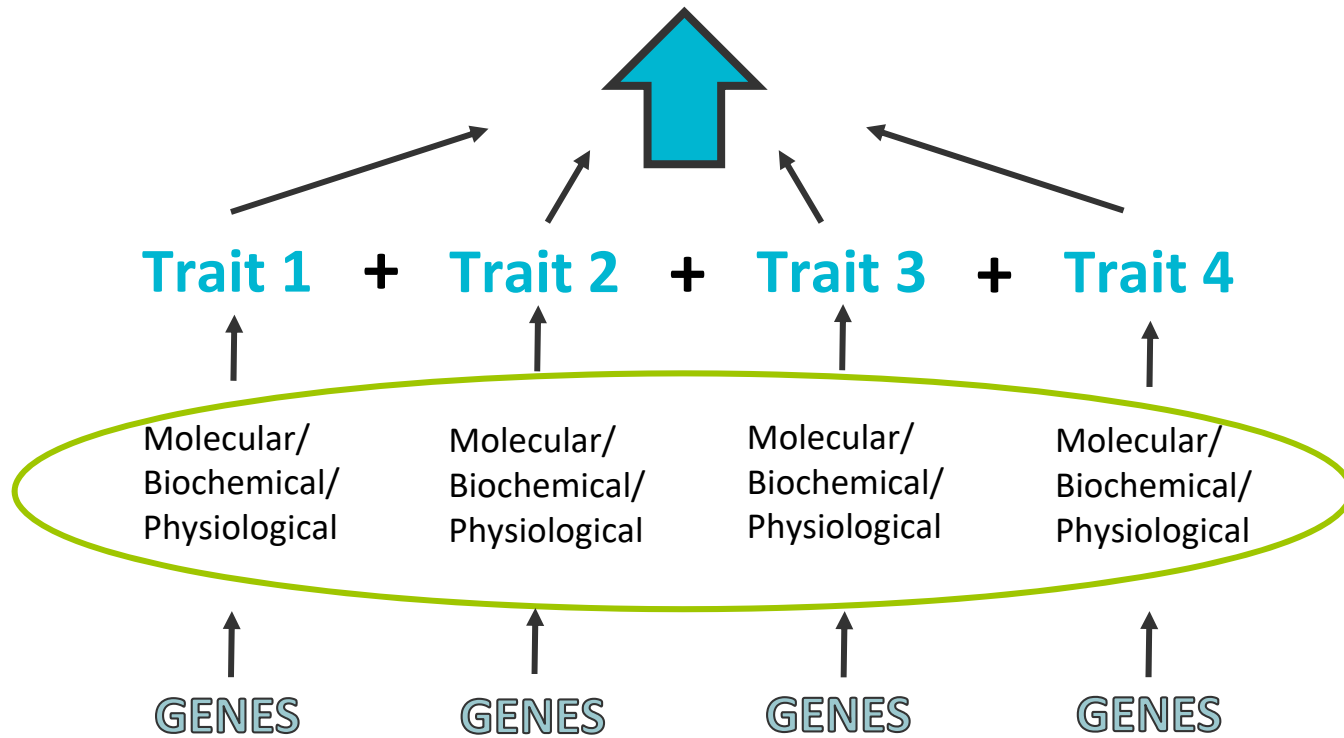

**Cross-crop
technologies**

COMPLEX CHARACTERISTICS

Understanding the **physiological**, **biochemical**, and **molecular** processes that influence the traits that give rise to complex characteristics.

CROP CHARACTERISTIC
